

EZbra Features Guide

Adjustable Personalized Compression

Provides needed compression and support.
Hygienic solution that won't compromise support needs.

Breast Fold IMF Definition

Lower straps are designed to support the inframammary fold

Easy & Independent Application

Easy and fast dressing post-op, designed to reduce operating room time and recurring clinic visits

Implant Stabilization

Integrated upper and lower compression bands.

Sterile & Disposable

an hygienic solution that may reduce risk of infection and increases patient's independence

Asymmetry Compliance

Designed for individual fit of the breast and definition of breast folds

Patient-Driven Elegant Design

Easy and fast dressing post-op, designed to reduce operating room time and recurring clinic visits

Drain Management

Drain tube & bulb holder.

Absorption

Internal absorbent layer eliminates the need for absorbing pads, gauze & tapes
